

INTERIOR MOULDING & TRIM

Western Canada

METRIE.COM

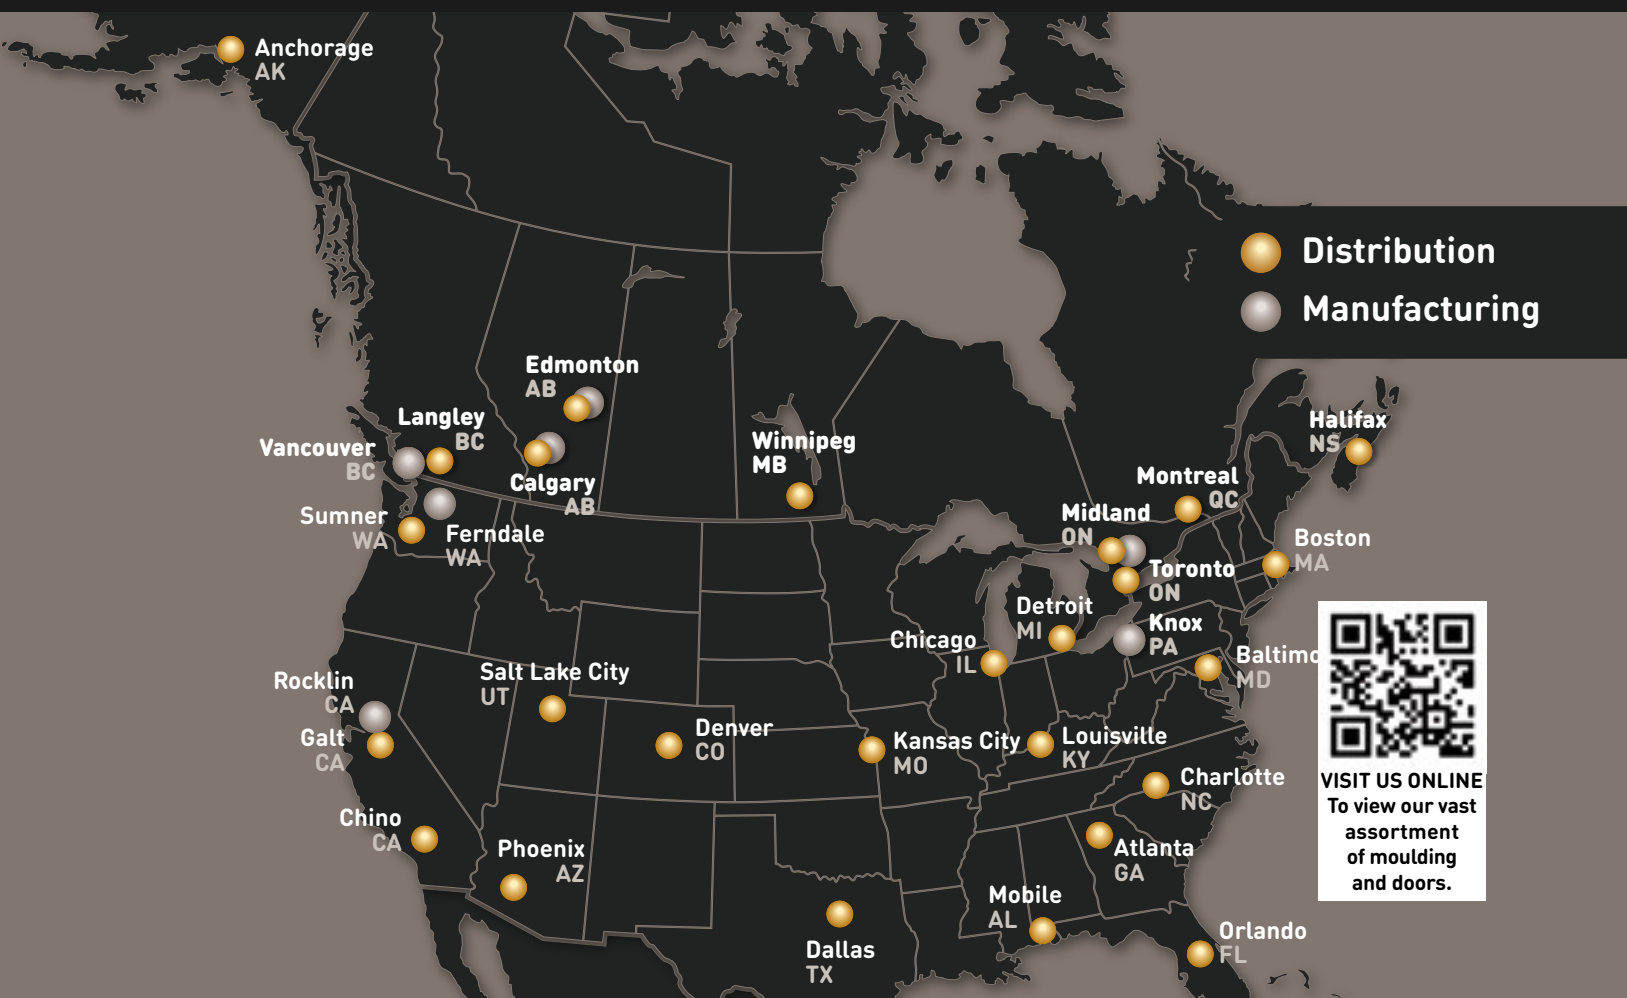

WE ARE METRIE

Operating six domestic manufacturing facilities between the U.S. and Canada, we are proud to be the largest manufacturer of MDF moulding in North America. With our commitment to product quality and waste reduction, we're building a brighter more responsible Metrie.

EXTENSIVE REACH WITH A LOCAL FEEL

Metrie has the broad reach and supply chain expertise of an industry leader with the personal touch of a family business.

Since 1926, we've honed our love of beautiful millwork into solutions that transform houses into remarkable homes, backed by expert support that ensures your renovation is in good hands.

STORAGE, HANDLING, AND PREPARATION OF ALL MOULDINGS AND S4S BOARDS

Prior to installation, it is important to acclimate your moulding and trim products by storing them in the installation space for at least 3 days. Wood and wood based products can expand and contract depending on internal and external environmental moisture levels. For best results, be sure to store products in a dry location and transport only if fully protected from water. Keep products clean from dirt and debris and finish according to paint and stain manufacturers' recommendations.

BASEBOARD

CATEGORY DESCRIPTION

Great baseboards create a smooth transition from the floor to the wall, guiding your eye from room to room. They work in harmony with your door and window casings, and should be chosen with care, not just for their appearance but also for their quality and durability. They are the finishing touch that makes a room feel complete and should be chosen with care, not just for their appearance but also for their quality and durability.

ARCHITRAVES

An architrave is a form of trim used to accent the top of a doorway, window or opening. It may also be referred to as a header or pediment. High above windows and doors, architraves work to add grandeur to any space – reducing miter lines and elevating your look. A great architrave is, above all else, the dressing that's built to impress.

Casing is used generously in spaces and is often the most visible moulding in a room. Casings are primarily used to go around a door or window, covering the gap between drywall and the door or window frame. Casings are generally thicker than base mouldings, they bring a room together: left to right, top to bottom. And like any framing element, the options are endless, from build ups of multiple pieces to full wraps. With casings, there is no wrong way, only your way.

Crown moulding is versatile. Designed to sit at an angle between the wall and ceiling, it can be used as part of the mantel on a fireplace surround, integrated into the architrave or header over a door or window, or to encase the top of a column.

Items without a stocking icon next to the SKU are available at both branch locations. For interest in moulding profiles that are available in other regions, reach out to your local sales representative or log onto My Metrie for availability.

T-ASTRAGAL

An astragal is commonly used as a seal between a pair of double doors, often in conjunction with a flush bolt. The astragal closes the clearance gap between two doors, making closing a pair of doors together easier. The vertical moulding attaches to a stile on one of a pair of doors against which the other door strikes or closes.

BASE SHOE

Base shoes are versatile profiles that work to solve numerous moulding and trim needs. Base shoes are primarily used to trim flooring materials and are often used in combination with a traditional baseboard to conceal variations between the flooring and the base.

BURLAP

Burlap is used to cover the joint between two flush surfaces to ensure a smooth transition. It helps hide unattractive seams between surfaces while adding a refined touch to wall panels, wainscoting, or chair rail projects.

CHAIR RAIL

Chair rail creates a beautiful room accent that's practical, yet decorative. Applied to a wall anywhere from 24 to 72 inches up from the floor, they can be used to protect the wall from scuffs and dents from the backs of chairs. The chair rail runs along the wall, parallel with the baseboard and is often paired with a wainscot treatment.

STOP

In door trim, a stop is attached to the door jamb on both sides and at the top. It is where the door comes to a rest when it is closed, stopping the door from moving any further and covering the gap that would otherwise appear between the door and the jamb. In window trim, a stop holds the bottom sash of a double-hung window in place and can also be used as an apron under window stools.

DON'T UNDERESTIMATE MOULDING

Progressive builders across the country are carrying over best practices from flooring and cabinets into millwork. Metrie Complete® Pre-finished millwork innovates the build process resulting in a reduction of costs on every home and a faster closing.

THE METRIE COMPLETE® ADVANTAGE

TRIM TIME & COSTS WITHOUT TRIMMING QUALITY.

SUPPLY - Supplied from Metrie's North American manufacturing and pre-finishing facilities.

PROCESS - Streamlined and patented install and finishing process that saves time and labor.

QUALITY - Meets factory colour, sheen & texture thresholds with special paint additives to protect the finish and deliver a consistent quality product.

SUPPORT - In-field install support, including accessory training, install and spec sheets, and hands on support to help drive success.

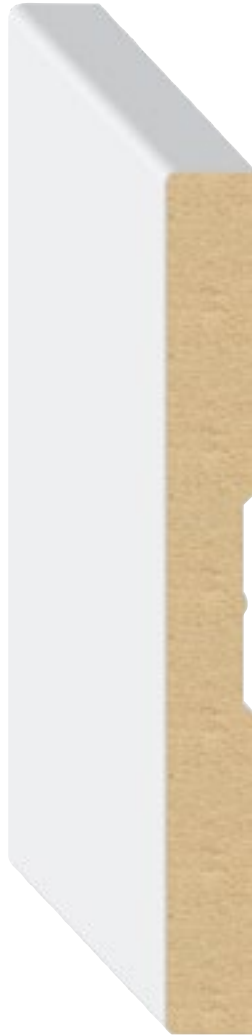

THE OLD WAY VS. THE NEW WAY

Finish with **METRIE COMPLETE®** COLOUR-MATCHED ACCESSORIES & achieve that professional finish every time.

POLAR WHITE CAULKING

Colour-matched for use with Metrie Complete® pre-painted products. This sealant should be used to fill joints and gaps between the walls and edges of the trim after the installation.

POLAR WHITE PUTTY FILLER

Colour-matched for use with Metrie Complete® pre-painted products. Our Premium Finishing Putty is a quick and easy way to fill minor seams and voids or to make small cosmetic repairs.

POLAR WHITE WAX FILL STICK

Colour-matched for use with Metrie Complete® pre-painted products. Our Premium Wax Filler is a quick and easy way to fill in nail holes after installation. It is also ideal for touching up any future blemishes that may occur over the life of the moulding.

SCRAPER CARD

Scraper card used to remove excess product from Metrie Complete® mouldings and boards.

BUFFING PAD

Buffing pad can be used to remove excess wax from the face of the trim.

BUILDER KIT

Colour-matched for use with Metrie Complete® pre-painted products, our finishing Kits include a premium wax stick, buffing pad and leveling card to fill nail holes, buff and remove loose wax for a smooth finish.

Images shown are not to actual size.

INTERIOR MILLWORK COMBINATIONS

The most popular trends, reimagined by our top designers.

[METRIE.COM/OPTIONM](https://metrie.com/optionm)

With a fresh take on rustic design elements, this style brings the appeal of the simple life into modern times for a vibe that's inviting and memorable.

Exude down-home comfort by installing a feature wall of shiplap. For a twist on the traditional application install your shiplap vertically to create the appearance of a taller ceiling height.

Inspired by factories from the past, this style features raw, exposed materials contrasting with mixed textures for dramatic, edgy spaces that are authentically cool.

The unadorned trim finishes the space and revitalizes a vintage foundation without overshadowing the original elements.

Channel the romance of this style. Create cozy interiors with delicate, distressed décor. It's all about embracing imperfections and finding beauty in soft flourishes and timeworn elegance.

Install chair rail just above your baseboard and below your crown to create visual interest and a nicely framed wall. Keeping the trim white against a darker painted wall adds a nice pop of color.
